<b>SQL Querying - Level 1 Fundamentals of Querying / EUR 550</b>					<b>SQL Querying - Level 2 Advanced Querying / EUR 550</b>					<b>Adobe Acrobat XI Pro - Part 1 / EUR 140</b>				
In this course, students will compose SQL queries to retrieve desired information from a database.					In this course, students will learn how to identify and use advanced querying techniques. You may perform tasks such as modifying the structure of a table: inserting, updating, deleting data and indexing tables to optimize query performance.					Students will learn the power of the Portable Document Format. Taking advantage of the functionality and features available in Acrobat, students will ensure the integrity of electronic documents for any viewer, on any devices, or operating systems.

<b>50331 Windows 7, Enterprise Desktop Support Technician / EUR 2,750</b>					<b>20346 Managing Office 365 Identities and Services / EUR 2,750</b>					<b>Access 2007 - Level 2 / EUR 590</b>																	
This course provides students with the knowledge and skills needed to isolate, document and resolve problems on a Windows 7 desktop or laptop computer.					This course focuses on skills required to set up an Office 365 tenant, including federation with existing user identities, and skills required to sustain an Office 365 tenant and users.					In this course, students will create complex Access databases by structuring existing data, writing advanced queries, working with macros, making effective use of forms and reports, and also by performing database maintenance. This course describes how to monitor and operate a cloud with Microsoft System Center 2012 R2. It focuses on how to manage and administer a cloud environment and describes how you can monitor key infrastructure elements and applications.					Students will gain the knowledge and skills to configure and manage a Lync Server 2013 on premises, in the cloud or in a mixed deployment.					This course provides guidance on planning and deploying desktops by using several technologies such as User State Migration Tool (USMT), Microsoft Deployment Toolkit (MDT), Virtual Desktop Infrastructure (VDI), and more.

This course equips students with the skills they require to configure and deploy a cloud using Microsoft System Center 2012 R2.					Students will learn the skills you need to deploy and manage a Microsoft Server Virtualization infrastructure in an enterprise environment.					This course provides students with the skills needed to design, deploy, and manage a physical and virtual Windows Server 2012 application management infrastructure, and focus on using Microsoft System Center 2012 Service Pack 1 (SP1).

<b>10974 Deploying Windows Server® / EUR 1,485</b>					03/30 - 04/03					<b>20411 Administering Windows Server 2012 / EUR 2,750</b>				
In this course, you will learn how to plan for and deploy your Windows Server infrastructure in physical, virtual, and cloud environments. You will learn about different deployment methodologies and techniques, as well as general imaging usage and configuration.					03/30 - 04/03					This course focuses on the administration tasks necessary to maintain a Windows Server 2012 infrastructure such as configuring and troubleshooting name resolution, user and group management with Active Directory Domain Services (AD DS) and Group Policy.
